Winstat BF-SZAll

Ultra-compact Air Ionizer

The BF-SZAll blower is a small profile ionizer, and is a great choice to address static problems in locations that have physical restrictions. The ionizer is ideally suited for both the Electronics industry along with the Life-Sciences market where ESD events can cause process issues, and destruction to electronic components.

The blower can also be used for in-tool applications and for spot ionization, instead of using compressed air technology.

Features include:

- HV Alarm and Fan Alarm function
- Easy maintenance with detachable louver to gain access to emitters
- Safety feature shutting blower off if the louver is removed
- On/Off rocker switch
- Fan speed adjustment option available; (small phillips screwdriver required to control speed)

****Please Note**** - AC Adapter (p/n OBF-24V) is not included with the purchase of a SZAll blower. AC100-240V wall transformer sold seperately.

Specifications: Winstat SZAll

Type:	Ultra-compact air ionizer
Input Voltage	DC24V
Air Volume:	7-11cfm
Output Voltage:	AC 2500V
Ion Balance:	below +/- 10V
Sound Level:	48dbA (at 3ft distance)
Ambient Temp.:	< or = 40C (104F)

Accessories:	Signal output cable, Cleaning Brush, Manual
Weight:	13 oz (w/ bracket)
Dimensions:	width 2.75 in. height 3.2 in. depth 1.8 in.
